WISHLED

Aluminijska LED podna lajsna

Wishled aluminijska LED lajsna može se uklopiti u bilo koji okoliš zahvaljujući neograničenim mogućnostima dizajna uzoraka.

Uglavnom se preferira kao noćna rasvjeta u dječjim sobama sa svojom zamjenjivom dizajnerskom tiskanom koricom.

Također se može koristiti za oglašavanje i predstavljanje korporativnog identiteta na javnim mjestima.

Uz svojstvo osvjetljavanja, pokriva i nedostatke na podnim i zidnim spojevima.

Primjena će biti dovršena montažom ploče difuzora s prednjim dizajnom i njezinim sustavom zaključavanja.

S unutarnjim, vanjskim i krajnjim pokrovnim kapama, koje su iste boje kao i profili, lako se mogu postaviti glatki zavoji kutova bez potrebe za kutnim rezom.

Wishled ima opcije mat eloksiranog, svijetlo eloksiranog, satinirano kemijski svijetlo eloksiranog i elektrostatskog bojanja u prahu.

Iako su dostupni srebrni, žuti, inox, brončani i crni anodizirani premazi u boji, također se može bojati u željenu RAL šifru elektrostatskim bojanjem u prahu.

Uz postojeće dizajne uzoraka koje nudimo za rasvjetnu ploču, mogu se primijeniti i personalizirani dizajni.

PRIKLADNO ZA SVAKO OKRUŽENJE S NEOGRANIČENIM DIZAJNOM

WISHLED

Aluminum LED Skirting Board

Wishled aluminum LED skirting board can match with any environment due to its unlimited pattern designs options. It is mostly preferred as night lighting in children's rooms with its replaceable design printed cover. It can also be used for advertising and to present corporate identity in public areas. In addition to its illumination feature, it also covers the defects in floor and wall joints. Application will be completed by mounting the front design printed diffuser panel with its snap lock system. With the inner, outer and end covering caps, which are the same color as the profiles, smooth corner turns can be easily applied without the need for an angled cut. Wishled has matte anodized, bright anodized, satin chemical bright anodized and electrostatic powder painting options. While silver, yellow, inox, bronze and black anodized color coatings are available, it can also be painted to the desired RAL code with electrostatic powder painting. In addition to existing pattern designs we offer for the illumination panel, personalized designs can also be applied.
