

# FLEX

## Aluminum Flooring

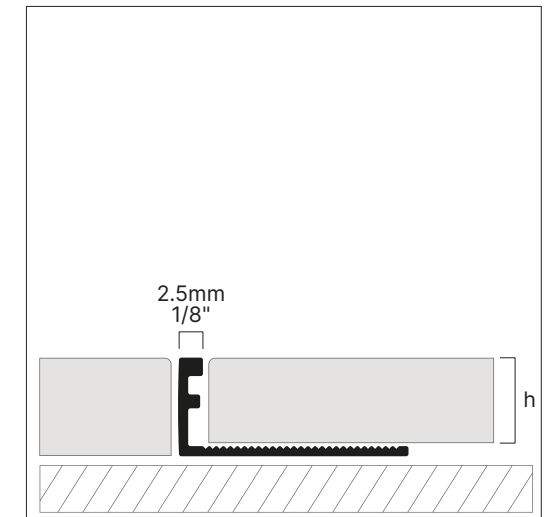

Flex aluminum formable flooring edge profile is used in parquet or ceramic applications as a frame that conceals the floor section, replacing joints. In addition to correcting joint and installation mistakes and improving aesthetics, it also prevents damage to the floor coverings. Flex aluminum formable flooring edge profile is designed to facilitate the transition of flooring materials. Its flexible design allows it to be bent into the desired shape. In addition to its functional advantages, its minimal appearance enhances the overall look of your designs.

Flex has matte anodized, bright anodized and electrostatic powder painting options. While silver, yellow, inox and black anodized color coatings are available, it can also be painted to the desired RAL code with electrostatic powder painting.

CREATE IMAGINATIVE DESIGNS FOR YOUR FLOORING WITH ITS FORMABLE FORM
