

MPS-F

MPS-F stainless steel skirting board profile is designed to provide skirting in ceramic applications. It prevents moisture in the application areas and reduces the transmission of impact sound. Gives an aesthetic appearance by hiding application defects in floor and wall transitions. It is extremely durable, long-lasting and corrosion resistant since it is produced from 304L quality stainless steel. 201 quality stainless steel alternative also available. MPS-F provides a flush appearance with its joint extension.

prevents moisture penetration to joints and reduces sound transmission in the impact zone
