Tpingijiet originali u pagni ta' referenza

- 1** Installation can be done with screws or silicone glue. The correct application must be carefully identified according to the wall material.

- 2** Place the correct dowels according to the wall material into the drilled holes.

- 3** Screw the wall fixation parts to the places that are drilled at 50cm intervals.

- 4** Insert the LED strips into the slots at the top and bottom of the profile.

- 5** Slide to connect the bottom diffuser to the front cover.

- 6** Connect the LED strips and the driver and the driver to the mains. Cables can be carried within the profiles for multi-drive connections. Consult local electricians to obtain accurate results.

- 7** Press the front cover against the back plate until it clicks into place.

- 8** Insert the top diffuser.

- 9** Apply adhesive to the internal corners to secure them in position.

- 10** Apply adhesive to the external corners to secure them in position.

- 11** Apply adhesive to the ending parts to secure them in position.
